THNKS

Send Thnks from Your Company Email

All Thnks are sent by default from "hello@thnks.com". As an exclusive feature for our Enterprise users, Thnks can be sent directly from your company email domain, for example "yourname@company.com".

Benefits of Sending from Your Company Email

☑ Enhance the recipient experience

☑ Enable receipt forwarding to your expense management system

You can give Thnks permission to send emails on your behalf by simply connecting an email sending domain for DKIM (Domain Keys Identified Mail) email authentication. Enterprise users can reach out to their account manager to get set up!
